

A Holiday Exploration at Harvard University

A Peek at Printing: From Papyrus to Electronic Paper

A science presentation for kids and adults (recommended for ages 10 and up).

Saturday December 13 at 10 a.m.
Science Center, Lecture Hall B

The lecture is modeled on a famous set of presentations first given to children a century ago as part of the Royal Institution Christmas lectures in London. Experiments and demonstrations will highlight the properties of paper and ink that make printing possible, and which further lead to ideas for “paper” of the future.

Free and Open to the Public. Tickets are required.

To obtain tickets, please register online at
